# 1. A quick review: webmail

## Introduction to Gmail

### Congratulations!

You've successfully signed up for Gmail. Here are three things you really should know before you get started.

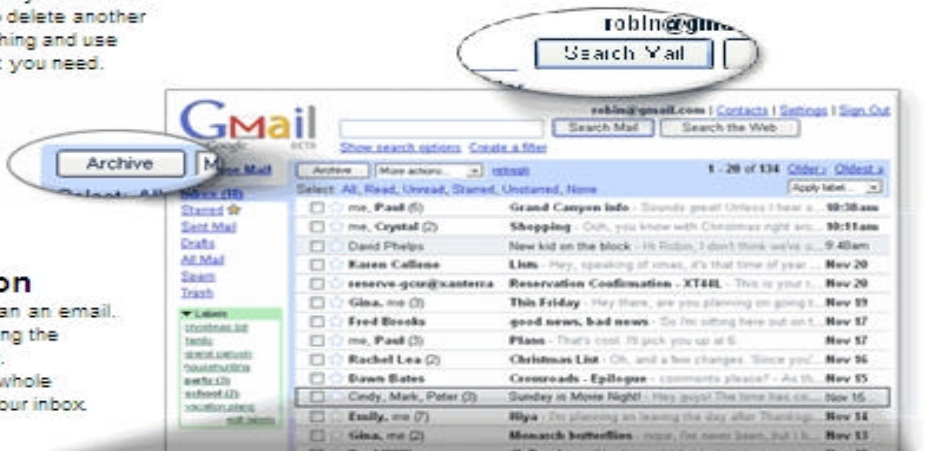

[I'm ready - show me my account](#)

### Archive, don't delete

With more than 2,500 megabytes of free storage, you never need to delete another email. Just archive everything and use Gmail's search to find what you need.

### Great search, less filing

Never file another message or create another folder. Use Gmail's built-in Google search to quickly find the email you need.

### Enjoy the conversation

Each item in your Inbox is more than an email. It's an entire conversation, containing the original note and all the replies to it. When a new message arrives, the whole conversation moves to the top of your inbox.

# Gmail: apply and sign in

- Gmail is Google's "free" webmail service
- How do you find the Gmail sign-in page?
- Please apply and sign in.
- English interface

## 2. Browser 瀏覽器

- How many web browsers have you used before?
  - Internet Explore
  - Netscape
  - Firefox

# Firefox 火狐: download and install

## Firefox® 2

The award-winning Web browser is now faster, more secure, and fully customizable to your online life. With Firefox 2, we've added powerful new features that make your online experience even better.
